NOSANA

Nosana is a decentralized CI/CD platform on Solana. With the Nosana app anyone can use their mobile devices to earn NOS tokens.

(CC	Nosana CI Demo build		
Recent pipelines for solana-labs/solana			
Status	Flow	Trigger	Commit
passed	solana- labs/solana	<u>Fix solana docker image</u>	e030221
passed	solana- labs/solana	feature: add new token program feature (#18780)	51f3b9a
passed	solana- labs/solana	Explorer: Include loader ids in program labels (#18778)	2bc7edf
passed	solana- labs/solana	chore: bump @types/node from 16.3.3 to 16.4.0 in /web3.js (#18799)	de35451

Market

Tech companies are running millions of CI/CD pipelines daily to operate. The size of this market is estimated to reach over \$13 billion in 2023 of which half is centralized at the top 5 providers.

Staking

Anyone that has the Nosana app can run CI/CD pipelines from our marketplace. It's that simple: run the app, stake NOStokens, and start earning!

Governance

Nosana will be the decentralized replacement for the CI/CD industry. Network updates and funding initiatives will be governed by a proposal system based on the NOS token.

CI by the people,

NOSAN

Tokenomics

Public Sαle: 3000000

Airdrop: 5000000

Liquidity: 10000000
